PROFESSIONAL SUMMARY

Results-driven B.Tech CSE (AI & DS) student with strong fundamentals in Python, Machine Learning, Data Science, and Data Visualization. Hands-on experience in building AI-based real-world projects such as the PredictiX Multi-Disease Prediction Web App and AI Sign Language Interpreter. Published researcher in JETIR (2025). Seeking internship opportunities to apply skills in AI/ML, data analytics, and software development.

EXPERIENCE

- Ethara AI**
LLM Post Training Intern
• Executed data preparation and evaluation tasks for AI and data projects supporting Large Language Model (LLM) post-training workflows.
• Utilized the Multimango data annotation platform to facilitate accurate data processing and model evaluation.
- Journal of Emerging Technologies and Innovative Research (JETIR)**
Research Author
• Published research paper: “PredictiX: A Practical Framework for Multi-Disease Prediction using Supervised Machine Learning” (Volume 12, Issue 9).
• Developed a supervised ML-based framework for multi-disease prediction, focusing on accessible healthcare solutions.

EDUCATION

- Sanjivani University**
B.Tech Computer Science Engineering (AI & Data Science) | CGPA: 8.03
- Sai Nirman Junior College**
Intermediate (HSC)
- St. John’s English Medium School**
Secondary School (SSC)

TECHNICAL SKILLS

- Languages:** Python, Java, C/C++ (Basics), SQL
Data Science & ML: Pandas, NumPy, Scikit-learn, Data Preprocessing, Supervised ML
Computer Vision: OpenCV, MediaPipe
Tools & Platforms: Tableau, Git, GitHub, Jupyter Notebook, VS Code
Core Concepts: OOP, Data Structures, Problem Solving, Teamwork

PROJECTS

- PredictiX – Multi-Disease Prediction Web App** | *Python, Scikit-learn, Pandas*
• Designed and implemented a Machine Learning pipeline including data cleaning, preprocessing, model training, and prediction.
• Developed a user-friendly interface for real-time disease prediction.
• Formulated the technical foundation for the published research paper in JETIR.
- AI Sign Language Interpreter** | *Python, OpenCV, MediaPipe*
• Developed an AI system to interpret sign gestures using computer vision techniques.
• Implemented real-time gesture detection and tracking to support communication accessibility.
• Engineered sign-to-text and sign-to-output functionality to bridge communication gaps.
- Professional Inventory Management System** | *Java, OOP*
• Built a comprehensive inventory management system utilizing Object-Oriented Programming principles.
• Implemented features for stock updates, product records, and workflow management.
- Consumer Complaint Dashboard** | *Tableau*
• Created an interactive Tableau dashboard to visualize actionable insights from consumer complaints.
• Applied advanced filtering and charting techniques to enhance data readability.

CERTIFICATIONS & ACHIEVEMENTS

- ISRO / IIRS:** START 2025 Programme (Score: 85%)
- IBM:** Introduction to Python, Data Visualization
- E-Cell IIT Bombay:** Illuminate Entrepreneurship Bootcamp
- FutureSkills Prime:** Digital 101 Journey
