PROFESSIONAL SUMMARY

Results-driven B.Tech CSE (AI & DS) student specializing in Python, Machine Learning, Time-Series Forecasting, and LLM Post-Training workflows. Experienced in developing end-to-end ML solutions (PredictiX, Retail Sales Forecasting) and published researcher in JETIR (2025).

EXPERIENCE

Vaidsys Technologies • *Data Science Intern* *Aug 2026 – Sept 2026 | Remote*

- Developed machine learning time-series models for retail sales forecasting and multi-product inventory optimization.
- Engineered seasonality, trend, and lag features; achieved ≥90% accuracy, reducing stockouts by 15% and overstocks by 10%.

Ethara AI • *LLM Post Training Intern* *Feb 2026 – May 2026 | Gurugram*

- Executed data preparation, curation, and quality benchmarks for LLM post-training workflows on Multimango platform.
- Collaborated with senior AI engineers to refine data annotation pipelines and dataset quality assurance.

JETIR (Journal of Emerging Technologies & Innovative Research) • *Lead Author* *Sept 2025*

- Published research: "PredictiX: A Practical Framework for Multi-Disease Prediction using Supervised ML" (Vol 12, Issue 9).
- Structured supervised learning pipelines for real-time diagnostic risk assessment and accessible web deployment.

EDUCATION

Sanjivani University • B.Tech Computer Science Engineering (AI & DS) — CGPA: 8.03 *2022 – Present | Maharashtra*

Sai Nirman Junior College • Intermediate (HSC) *2022 – 2024 | Shirdi*

St. John's English Medium School • Secondary School (SSC) *2012 – 2022 | Rahata*

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL | **ML & DS:** Scikit-learn, Time-Series Forecasting, Pandas, NumPy, Feature Engineering
Computer Vision: OpenCV, MediaPipe | **Tools:** Tableau, Git, GitHub, Jupyter, VS Code, Multimango Platform
Core Concepts: Object-Oriented Programming, Data Structures, Problem Solving, Technical Writing

PROJECTS

Retail Sales Forecasting & Inventory Optimization | *Python, Scikit-learn, Time-Series* *Vaidsys Internship*

- Built predictive forecasting models on retail sales data, achieving ≥90% accuracy to prevent inventory overstock/stockouts.

PredictiX – Multi-Disease Prediction Web App | *Python, Scikit-learn, Pandas* *JETIR Published*

- Designed an automated ML classification pipeline with web interface for real-time risk predictions across multiple diseases.

AI Sign Language Interpreter | *Python, OpenCV, MediaPipe* *Computer Vision*

- Developed real-time hand gesture landmark tracking and sign-to-text translation system for accessibility.

Professional Inventory Management System | *Java, OOP* *Desktop System*

- Implemented OOP-based stock tracking, dynamic product catalogs, transaction logs, and inventory workflows.

Consumer Complaint Dashboard | *Tableau, Analytics* *Business Intelligence*

- Interactive Tableau dashboard visualizing complaint bottlenecks, resolution SLAs, and operational KPI trends.

CERTIFICATIONS & ACHIEVEMENTS

- **Vaidsys Technologies:** Certified Data Science Intern (Cert ID: VST0826652)
- **IBM Career Education:** Business Intelligence, DevOps Agile, Data Visualization, Introduction to Python
- **ISRO / IIRS:** Space Technology START 2025 Programme (Score: 85%)
- **E-Cell IIT Bombay:** Illuminate Entrepreneurship Bootcamp • **FutureSkills Prime:** Digital 101
